## Work History

### Principal Software Engineer

July 2017 to Present

*Oracle + NetSuite*

My primary focus was on empowering team members by pair programming, participating in code reviews, and mentoring on a large React codebase. In addition, I worked to modernize and improve our developer experience using tools like Webpack and Jest.

### Web Engineer

October 2013 to July 2017

*Weather Decision Technologies*

I built, organized, and directed my team to create some of the highest value services for the company. Using microservices and libraries like React and Hapi, we use weather data to build complex applications. In addition, I led my team in exploring new technologies to improve our products.

### Web Developer, Partner

Jan 2012 to October 2013

*OverDid.It*

### Web Developer, Freelance

Jul 2011 to Jan 2012

*Adcuda*

### Web Developer

Nov 2010 to Jun 2011

*Design By Caffeine*

## Skills

- JavaScript
  - React
  - webpack
- Node
- CSS
- Go
- Docker

## Volunteer Work

### **Techlahoma**

January 2018 to Present

*Secretary*

Techlahoma is a 501(c)(3) with the mission to advance Oklahoma's grassroots technology community. We do this by supporting user groups, running conferences and workshops, and mentoring.

### **Techlahoma**

December 2015 to Present

*Board Member*

### **OKC.js**

September 2014 to Present

*Co-Organizer*

I help organize the Oklahoma City JavaScript User Group.

## Education

### **Oklahoma City Community College**

August 2010 to May 2013

*Computer Science: Web Design and Development*

- Recipient of the President's Award for Excellence: Computer Science
