Work History

Web Engineer
Weather Decision Technologies

October 2013 to Present

Responsibilities include design and development of our enterprise client portal, and three weather map applications using technologies and libraries like Angular, React, Leaflet, WebGL, and WebSockets. We also develop internal tools for our forecast team to do their job better.

Web Developer, Partner
OverDid.It

Jan 2012 to October 2013

Web Developer, Freelance
Adcuda

Jul 2011 to Jan 2012

Lead Front-End Web Developer
Design By Caffeine

Nov 2010 to Jun 2011

Skills

JavaScript

CSS

HTML

Go

Docker

Volunteer Work

Techlahoma
Board Member   December 2015 to Present

Techlahoma is a 501(c)(3) with the mission to advance Oklahoma's grassroots technology community. We do this by supporting usergroups, running conferences and workshops, and mentoring.

OKC.js
Volunteer   September 2014 to Present

OKC.js is the Oklahoma City JavaScript User Group. I help organize this group.
